Question:

Find the equation of a circle passing through the point (7,3) having radius 3 units and whose centre lies on the line $y = x - 1$.

solution:

Variable	Description
P	point vector
$-u$	centre of the circle
r	radius of the circle

TABLE 0: Variables Used

From the given information, the following equations can be formulated using the circle equation

$$\|x\|^2 + 2u^\top x + f = 0 \quad (0.1)$$

$$\|P\|^2 + 2u^\top P + f = 0 \quad (0.2)$$

$$u = \begin{pmatrix} -k \\ 1 - k \end{pmatrix} \quad (0.3)$$

$$\|u\|^2 - f = r^2 \quad (0.4)$$

$$(0.5)$$

where

$$p = \begin{pmatrix} 7 \\ 3 \end{pmatrix}, r = 3 \quad (0.6)$$

$$(0.7)$$

From (0.2) and (0.4)

$$\|P\|^2 + 2u^\top P + \|u\|^2 = r^2 \quad (0.8)$$

$$(0.9)$$

Substituting from (0.3) and numerical values,

$$k^2 + (1 - k)^2 + 2(-k - 1 - k)\left(\frac{7}{3}\right) + \|P\|^2 - r^2 = 0 \quad (0.10)$$

$$2k^2 - 2k + 1 + 6 - 20k + 7^2 + 3^2 - 3^2 = 0 \quad (0.11)$$

$$2k^2 - 22k + 56 = 0 \quad (0.12)$$

$$k = 7, 4 \quad (0.13)$$

$$(0.14)$$

resulting in circles with centres

$$-u = \begin{pmatrix} 7 \\ 6 \end{pmatrix} \text{ or } \begin{pmatrix} 4 \\ 3 \end{pmatrix} \quad (0.15)$$

$$(0.16)$$
